HONEYWELL INTRODUCES NEW SMARTPAC 2 OPTION

Info Center Eliminates Paper Setups, Displays Setup Information at the Control

ACTON, MA, January 13, 2005 – Honeywell (NYSE:HON) Wintriss Controls Group today introduced Info Center, a new SmartPAC 2® option that eliminates the need for paper setup sheets by enabling press operators to display die and other press information on the large color SmartPAC 2 display. Using SmartPAC 2's built-in Ethernet connectivity, Info Center allows an unlimited amount of information to be stored on a central server, giving SmartPAC 2 operators easy access to data across the plant. By making new setups available as soon as documents have been revised, Info Center also makes it easier to change press information.

“Paper setup sheets have become increasingly cumbersome for many of our customers,” said Mark Hatch, product line director, Honeywell Process Solutions/Wintriss Controls Group. “Paper documents are often misplaced or rendered illegible by repeated use, and they must be replaced when setups are modified. We developed Info Center to address these challenges so our customers could focus on more strategic aspects of their businesses and make the most of their resources.”

Info Center lets customers store any type of information, including drawings, photographs, press schematics, and maintenance records. Operators select documents via the new Info Center item on the SmartPAC 2 Run menu. Wintriss provides templates with built-in scripts so that users can customize menu items for each tool, allowing easy navigation to needed information. Users can also program links to press documents using the SmartPAC 2 function keys.

Honeywell provides a broad portfolio of Wintriss automation and safety products to the metal stamping and forming industry. The product range includes light curtains, clutch/brake controls, die protection systems, load analyzers, in-die quality control systems and pressroom reporting software. The whole product line is built with traditional Wintriss quality and is backed
