HONEYWELL IMPROVES SMARTPAC 2 PRESS AUTOMATION CONTROLLER

New Standard Feature Provides Expanded Networking Benefits

ACTON, Massachusetts, March 26, 2007 – Honeywell (NYSE:HON) Wintriss today announced that SmartPAC 2®, its flagship press automation controller, now comes standard with a built-in backup utility. With the new feature, the SmartPAC 2 setup memory can be backed up over the Ethernet to a designated location on a user-selected server and later restored to the SmartPAC 2 if an unforeseen incident causes the memory to become corrupted.

The backup capability is configured using Honeywell's previously released SmartView networking utility, which also allows users to view the status of the jobs running in networked SmartPAC 2s from any computer via the Internet.

"Our new backup feature builds on the benefits already available to SmartPAC 2 customers," said Jim Finnerty, product manager, Honeywell Wintriss. "By simply plugging the SmartPAC 2 into the network, customers can immediately protect their time invested in creating the settings for up to 200 dies."

In addition to backup, standard functions available to networked SmartPAC 2s include the ability for press operators to send text messages via pagers, cell-phones and e-mail and for firmware upgrades to be downloaded to the SmartPAC 2 from a Wintriss Web site. Customers who want to create a paperless shop can purchase the Info Center option, which makes drawings, photos and setup sheets available to networked SmartPAC 2s from the customer's server.

Honeywell Wintriss is also introducing a new backup option for non-networked SmartPAC 2s that enables tool setups to be stored on a USB disk. When a USB disk is installed in the built-in USB port on a SmartPAC 2 configured with this option, all tool setup information can be backed up to this device with a single command. Each backup file is identified by the unique serial number of the SmartPAC 2, so multiple SmartPAC 2s can be backed up on a single USB disk. Maximum space required for each backup file is only 600 KB.
