

ShopFloorConnect[®] OEE and Downtime Tracking Software

Turnkey solution automatically tracks OEE for all machines

Displays the status of your machines, updated in real time

Clients (including mobile devices) need only a web browser

Reports can be distributed via email in a variety of formats

You can't improve what you don't measure

Key Benefits for Your Business

- Increase capacity and profitability by addressing downtime issues.
- Focus improvements in critical areas by quickly identifying & quantifying excessive production losses and bottlenecks.
- Make more informed decisions relating to capital equipment purchases.
- Better labor utilization & resource allocation.
- Quote accurate deliveries based on real-time information.
- Gain the ability to more quickly respond to machine stoppages and production deficiencies.
- Large-format factory displays that provide instant visibility of underperforming machines.
- Utilizes Microsoft SQL DB for easy integration with other software.
- Go paperless with the built-in job queue manager.

Why ShopFloorConnect is Different

- Our 50+ years of application experience with industrial machinery allows us to help you implement the system quickly.
- Simple turnkey interface on each machine that plugs directly into your existing network speeding the implementation.
- Truly automatic collection of uptime, downtime, and production counts with no manual data entry.
- Automatically generates and distributes user-configurable reports at scheduled intervals.

Instant Downtime Alerts

- ShopFloorConnect has the ability to send text alerts whenever a machine is down for longer than a preset time.

ShopFloorConnect

Turnkey Solution for Machine Connectivity

Universal

Downtime Reasons

Touch-screen

Lasers

Compare uptime efficiency and production rate for different material types.

Injection Molding Machines

Track production counts, uptime, downtime, temperature, and pressure.

Press Brakes

Track uptime, downtime, and OEE by part and operator.

Packaging Lines

Create efficiency reports by SKU number.

Stamping Presses

Track OEE by machine and by tool; keep track of the tonnage and the number of hits on each tool.

Machining Centers

Keep accurate production counts and track OEE by part.

SMI: ShopFloorConnect[®] Machine Interface

- Turnkey solution that is simple to implement.
- Ethernet ready—simply plug it into your network using the built-in RJ-45 (standard Ethernet) connector.
- Requires only a few simple connections to the machine.
- Touch screen operator interface.
- Fully customizable downtime reason codes for each machine.
- Built-in parts counter with preset.
- Ability to enter applicable job and operator parameters.
- Compatible with serial bar-code scanners.

Wintriss Controls is a leading manufacturer of data collection systems for all discrete manufacturing; and press automation, die protection and safety controls for metal stamping and forming industries. These products, which leverage Wintriss' 50+ years of experience, are known for their proven performance and rugged dependability in the toughest factory environments. Wintriss equipment is backed by attentive service, timely repairs, and comprehensive spares inventories. A toll-free hotline gives customers immediate access to technical support experts for product information and applications assistance.
